

The ingredient in our Vehicle Disinfectant spray is revolutionary. The ingredient is a certified virucidal, bactericidal and yeasticidal cleaner. The product sanitises all water washable surfaces, including; carpets, upholstery and soft furnishings, hard surfaces, walls, floors, toilets and washrooms etc. The product is bleach free and non-hazardous.

This specially formulated product kills: Swine Flu, HIV, Hepatitis C, MRSA, Clostridium Difficile (C. Diff), Common food poisoning bacteria, mould, mildew, fungi, yeast. On test, this product passes: EN1276, EN14476 and EN1650.

In the light of the Coronavirus pandemic, please see statement below from our suppliers laboratory:

Background

Coronaviruses are a large family of viruses. Some can cause illness in people including mild symptoms, such as the common cold. Other strains can lead to pneumonia and cause more severe disease e.g. SARS and MERS.

Surface Disinfection

The disinfectant ingredient has been assessed for virucidal activity following test methods such as BS EN 14476 and BS EN 14675. Results show it is effective against a range of viruses such as the H1N1 influenza virus, Norovirus, Hepatitis B, Hepatitis C, HIV and the Ebola virus. The Coronavirus is not currently available for commercial laboratories to test against so we cannot give a definitive contact time and dilution rate. However, given the above test data we can reasonably expect Craftex Micro Kill to have efficacy against the virus. We would therefore recommend using the product for general disinfection in the infection prevention and control for the 2019-nCoV.

Application

Dwell time 5 minutes for maximum effectiveness.
